

The 340B Drug Discount Program helps provide healthcare services to our communities.

The 340B Drug Discount Program requires drug manufacturers to provide drugs at a discounted price to Community Health Centers who reinvest the 340B savings to expand access to services, provide affordable medications, and cover the cost of serving uninsured and underinsured patients in their communities.

How 340B Works

The 340B Drug Discount Program must be safeguarded to ensure access and affordability.
