

Prevention is the *Key*

Primary care providers play an important role in cancer screening, educating patients, and helping them understand which screenings are recommended based on age, gender, and individual risk factors.

Common Cancer Screenings:

- **Breast Cancer** - Mammograms
- **Colorectal Cancer** - F.I.T. Kits
- **Cervical Cancer** - PAP Test
- **Prostate Cancer** - HPV Testing
- **Lung Cancer** - Low Dose CT Scans
- **Bladder Cancer** - Urinalysis
- **Thyroid Cancer** - CT Scan
- **Ovarian Cancer** - Pelvic Exam
- **Liver Cancer** - AFP Blood Test & Ultrasound

Ask your provider about getting screened today!
