

# Reinstate ACA Marketplace Tax Credits

**4.7 Million Floridians Impacted**

Reinstating ACA Marketplace Tax Credits Protects Coverage, Patients, and Community Health Centers

## Why Marketplace Tax Credits Matter for CHC Patients

Many CHC patients rely on Marketplace plans because they are:

- Working adults and families whose jobs don't offer affordable employer coverage
- Self-employed or part-time workers
- Individuals who earn too much for Medicaid but still can't afford full-cost premiums

**Enhanced tax credits make Marketplace premiums affordable—keeping people insured and connected to care.**

## What is the impact?

More Patients Become Uninsured

Coverage “Churn” Disrupts Continuous Care

Uncompensated Care and Financial Strain Increase

Community Access to Care Becomes Less Stable

## Bottom Line

Not reinstating the Marketplace tax credits could **increase the number of uninsured patients** served by CHCs and **destabilize care for working families** who rely on affordable coverage.

## What can you do to help?

Reinstate the enhanced ACA Marketplace tax credits to keep premiums affordable, prevent coverage disruptions, and protect access to care in Community Health Centers.
